Welcome to [IPSL-CMC](#) documentation and training page, maintained by the *Plateforme* group

Documentation

Documentation starts [here](#).

Training

You will find information and documents about the training sessions organised by the *Platform* work group [here](#).

Important News

News are sent to the **platform-users** mailing list. Important news are also available [here](#).

Mailing lists

There are two mailing lists associated with the *Platform* work group:

- **platform-users** : Open to every one, inscription [here](#). This list is meant as a place for all users of IPSL-cmc tools (mainly [libIGCM](#) and [modips1](#)) to help each other. These tools are generic, whatever the configuration ([LMDZ](#), LMDZOR, LMDZORINCA, [LMDZReprobus](#), [ORCHIDEE](#), [NEMO](#), IPSLCM5A...). Discussions are open to all and both French and English languages are welcome.
- [escl](#) : *Platform* work group private list, used to coordinate our work. Open to those who want to take part in the developments.
