Mailing lists

There are two mailing lists associated with the *Platform* work group:

- platform-users: Open to every one, inscription Lithere. This list is meant as a place for all users of IPSL tools (mainly libIGCM and modipsl) to help each other. It comes as a companion to this wiki. These tools are generic, whatever the configuration (LMDZOR, LMDZORINCA, LMDZReprobus, LMDZ, ORCHIDEE, NEMO, IPSLCM5A...). Discussions are open to all and both French and English languages are welcome.
- esci: Platform work group private list, used to coordinate our work. Open to those who want to take part in the developments.
