

## NAME

linkchecker.sh - check links of a given directory or url

## SYNOPSIS

```
$ linkchecker.sh -d dircheck -u url
```

## DESCRIPTION

check links of a given directory or url cf. install.sh

## EXAMPLES

### FILES

#### original location

/usr/home/fplod/src/superbib\_ws/linkchecker.sh sur aedon.locean-ipsl.upmc.fr

## EVOLUTIONS

++ linkchecker ne voit pas les erreurs !!

++ dirpublish forme [fplod@cerbere.locean-ipsl.upmc.fr](mailto:fplod@cerbere.locean-ipsl.upmc.fr):/WWW/ par exemple donc pas http

- ajouter la possibilite de faire une carte du site avec graphviz

exemple syntaxe

```
$ linkchecker -odot -v http://www.lodyc.jussieu.fr/NEMO/general/biblio_new/ | dot -
```

remove “set -u” because I don’t know how to test if there is at least one directory AND one url to be checked without this option

!! ++ must be restore ASAP

\$Id: linkchecker.sh 83 2008-12-19 10:55:44Z pinsard \$

- fplod 2008-12-19T10:05:59Z aedon.locean-ipsl.upmc.fr (Darwin)
  - bug fix for relative directory (thanks to Sébastien Masson)
- fplod 2008-09-16T15:28:34Z aedon.locean-ipsl.upmc.fr (Darwin)
  - comment in ReStructured Text
- fplod 2007-10-12T07:32:08Z aedon.locean-ipsl.upmc.fr (Darwin)
  - add -u pour url

- add multiple -d and suppression of interactivity
  - replace -w by -d (more generic)
  - use rather checklink than linkchecker because the first one exist either on Mac and Unix, and because the second one exists only on Mac and does'nt seem to detect every problem
- fplod 2007-10-11T15:31:25Z aedon.locean-ipsl.upmc.fr (Darwin)
  - parametrization
  - merge with checklink.sh ++ choisir entre les deux
- fplod 2007-06-19T09:26:04Z aedon.locean-ipsl.upmc.fr (Darwin)
  - création
